

HIGH BARRIER TRAY - FOR READY MEAL

All of the Rigid barrier film produced by Mylan Group can be used on our own thermoforming equipment to produce many types of pre-formed containers depend on customer request.

Thermoformed barrier containers are used in Fill and Seal equipment, and become an excellent alternative to glass and metal cans for a wide range of foods.

Mylan group's high barrier tray response to your needs in shelf life extension and food preservation in a number of processes, from Modified Atmosphere Packaging (MAP) or or Aseptic Filling, to demanding Sterilization of foods.
